## standards-based cylinder DSBC-50-60-PPSA-N3 Part number: 2102630 ★ Core product range

with self-adjusting pneumatic end position cushioning

## **Data sheet**

| Feature                                    | Value                                                            |
|--------------------------------------------|------------------------------------------------------------------|
| Stroke                                     | 60 mm                                                            |
| Piston diameter                            | 50 mm                                                            |
| Piston rod thread                          | M16x1,5                                                          |
| Cushioning                                 | PPS: Self-adjusting pneumatic end-position cushioning            |
| Assembly position                          | Any                                                              |
| Conforms to standard                       | ISO 15552                                                        |
| Piston-rod end                             | Male thread                                                      |
| Design structure                           | Piston                                                           |
|                                            | Piston rod                                                       |
|                                            | Profile barrel                                                   |
| Position detection                         | For proximity sensor                                             |
| Variants                                   | Single-ended piston rod                                          |
| Operating pressure                         | 0.4 12 bar                                                       |
| Mode of operation                          | double-acting                                                    |
| Operating medium                           | Compressed air in accordance with ISO8573-1:2010 [7:4:4]         |
| Note on operating and pilot medium         | Lubricated operation possible (subsequently required for further |
|                                            | operation)                                                       |
| Corrosion resistance classification CRC    | 2 - Moderate corrosion stress                                    |
| Ambient temperature                        | -20 80 °C                                                        |
| Impact energy in end positions             | 1)                                                               |
| Cushioning length                          | 22 mm                                                            |
| Theoretical force at 6 bar, return stroke  | 990 N                                                            |
| Theoretical force at 6 bar, advance stroke | 1,178 N                                                          |
| Moving mass with 0 mm stroke               | 365 g                                                            |
| Additional weight per 10 mm stroke         | 56 g                                                             |
| Basic weight for 0 mm stroke               | 1,190 g                                                          |
| Additional mass factor per 10 mm of stroke | 25 g                                                             |
| Mounting type                              | with internal (female) thread                                    |
|                                            | with accessories                                                 |
|                                            | Optional                                                         |
| Pneumatic connection                       | G1/4                                                             |
| Materials note                             | Conforms to RoHS                                                 |
| Material cover                             | Die-cast aluminium, coated                                       |
| Material piston seal                       | TPE-U(PU)                                                        |
| Material piston                            | Wrought Aluminium alloy                                          |
| Material piston rod                        | High alloy steel                                                 |
| Material piston rod wiper seal             | TPE-U(PU)                                                        |
| Buffer seal material                       | TPE-U(PU)                                                        |
| Cushion piston material                    | РОМ                                                              |
| Material cylinder barrel                   | Smooth-anodised wrought aluminium alloy                          |
| Material nut                               | steel, galvanized                                                |
| Material bearing                           | POM                                                              |
| Material of flange screw                   | steel, galvanized                                                |
