# Key features

## Application

Choosing the right fitting is effortless. With a system that includes well over 1000 types of standard and function fittings, Festo offers a secure solution for every connection.

| Summary of tubing/fitting   | combinations           |              |   |
|---|------------------------|--------------|---|
| Applications  | Fitting                | Tubing       | Description   |
| Standard  | QS                     | PEN          | Suitable for a wide range of tasks and attractively priced. Flexible thanks to highly resistant materials, easy to install thanks to optimised bending radii. High level of abrasion resistance in dynamic applications.    |
|   | QS                     | PUN          | Maximum flexibility in standard applications thanks to an extremely wide range of options for combining the different types.  |
|   | QS                     | PAN          | Meets all requirements, even for standard applications with increased pressure and temperature ranges.  |
| High pressures  | NPQM                   | PAN-MF       | Meets DIN 73378: ideal for use in mobile pneumatics. Suitable for increased temperature ranges combined with high pressure ranges.  |
|   | NPQH                   | PAN-R        | Powerful in pressure ranges up to 20 bar, for example in applications with the pressure booster DPA.  |
|   | NPQR                   | PUN-H-SF     | Use in areas with higher pressure ranges and humidity. Tubing PUN-H-SF is resistant to kinking and hydrolysis and is suitable for water applications.   |
| Resistant to chemicals and hydrolysis   | NPQP                   | PLN          | Resistant to cleaning agents, FDA-compliant and economical. Can be used instead of the combination with stainless steel fittings.   |
|   | NPKA                   | PUN-H        | Hydrolysis-resistant and suitable for water applications. Combination suitable for use in cleanrooms, FDA-compliant and corrosion-resistant because it's 100% polymer. Very easy to install with the "one-click principle". |
|   | NPQR                   | PFAN/PTFEN   | Optimised design, fewer edges where dirt can collect – all at an attractive price. For high temperatures up to 150 °C. Pressure range up to 16 bar. Maximum corrosion resistance (CRC 4).                                   |
| esistant to chemicals and ydrolysis  esistant to chemicals and ydrolysis  NPO  NPO  NPO  NPO  NPO  NPO  NPO  NP | NPCK                   | PFAN/PTFEN   | Easy to clean thanks to the union nut's edge-free design. Maximum corrosion resistance (CRC 4) and FDA-compliant. Suitable for a wide range of media.   |
| Resistant to chemicals and hydrolysis, food-safe  | NPQR                   | PUN-H-F/PFAN | Food-safe to Regulation (EC) No. 1935/2004 and FDA-listed materials. Can be used in the food and packaging industry in combination with PUN-H-F and PFAN.   |
|   | NPQH                   | PFAN/PTFEN   | For high temperatures up to 150 °C. Food-safe to Regulation (EC) No. 1935/2004, FDA-listed materials and resistant to cleaning agents.  |
| Anti-static   | NPQM                   | PUN-CM       | Anti-static tubing plus solid metal fitting: maximum protection for electric and electronic components.   |
| Flame-retardant   | NPQM                   | PUN-V0       | Very safe in areas where there is a risk of fire thanks to flame-retardant properties. The tubing has been tested to DIN 5510-2.  |
| Resistant to welding spatter  | NPQH                   | PUN-VO-C     | Ideal for applications with welding spatter. Reliable thanks to a tubing wall thickness of 2 mm for all diameters.  |
|   | QS-V0                  | PAN-VO       | Safe even in the immediate vicinity of welding spatter thanks to double-walled tubing with special fitting.   |
| Battery production  | NPQE-F1A <sup>1)</sup> | PUN-H        | Suitable in battery production areas.   |

<sup>1)</sup> F1A = Free of copper, zinc and nickel

# Key features

# Push-in fittings – Product range QSM, mini series

#### Datasheets → Internet: qsm

Compact push-in fittings for maximum component density in confined spaces. For pneumatic applications with a temperature range up to 80 °C and a pressure range up to 14 bar.

Tubing O.D. of 2, 3, 4 and 6 mm with connecting threads M3, M5, M6, M7, R1/8 and G1/8.

#### QS-V0, resistant to welding spatter

Datasheets → Internet: qs-v0

Flame-retardant push-in fitting for use in all areas where there is a risk of fire, for example welding systems in the automotive industry, and in the construction industry. For pneumatic applications with a temperature range up to 60 °C and a pressure range up to 10 bar.

Tubing O.D. of 4, 6, 8, 10 and 12 mm with connecting thread R1/8 ... R1/2 and G1/8 ... G1/2.

#### NPQM Datasheets → Internet: npqm

Attractively priced metal push-in fitting for pneumatic applications with a temperature range up to 70  $^{\circ}$ C and a pressure range up to 16 bar.

Tubing O.D. of 3, 4, 6, 8, 10, 12 and 14 mm with connecting thread M5, M7 and G1/8... G1/2.

#### NPQR, stainless steel

Datasheets → Internet: npqr

Stainless steel push-in fitting. Maximum corrosion resistance CRC 4 and chemical resistance. For pneumatic applications with a temperature range up to 150 °C and a pressure range up to 16 bar.

Tubing O.D. of 4, 6, 8, 10 and 12 mm with connecting thread M5, M7 and  $G1/8 \dots G1/2$ .

#### QS, standard series

Datasheets → Internet: qs

Wide selection of push-in fittings for pneumatic applications with a temperature range up to 80  $^{\circ}$ C and a pressure range up to 14 bar.

Tubing O.D. of 4, 6, 8, 10, 12, 16 and 22 mm with connecting thread R1/8 ... R1/2 and G1/8 ... G3/4.

#### NPQH

Datasheets → Internet: npqh

All metal push-in fitting made of chemically nickel-plated brass. High corrosion resistance CRC3 and chemical resistance. For pneumatic applications with a temperature range up to 150 °C and a pressure range up to 20 bar. Tubing O.D. of 4, 6, 8, 10, 12 and 14 mm with connecting thread M5, M7 and G1/8 ... G1/2.

#### NPQP

Datasheets → Internet: npqp

Polypropylene fitting for use in applications with extreme media influences. For pneumatic applications with a temperature range up to 60 °C and a pressure range up to 10 bar.
Tubing 0.D. of 4, 6, 8, 10 and 12 mm

Tubing O.D. of 4, 6, 8, 10 and 12 mm with connecting thread R1/8 ... R1/2.

### Key features

#### Functional push-in fittings - Product range

QSK, push-in fitting, self-sealing

Datasheets → Internet: qsk

QSR, push-in fitting, rotatable

Datasheets → Internet: qsr

Push-in fitting blocks the air flow after the tubing is disconnected. For pneumatic applications with a temperature range up to 60 °C and a pressure range up to 14 bar.

Tubing O.D. of 4, 6, 8, 10 and 12 mm with connecting thread M5, R1/8 ... R1/2 and G1/8 ... G1/2.

Push-in fitting with swivel joint, rotatable by 360°. The ball bearing enables rotating movements in the application up to max. 500 rpm. For pneumatic applications with a temperature range up to 60°C and a pressure range up to 14 bar.

Tubing O.D. of 4, 6, 8, 10 and 12 mm with connecting thread M5, R1/8 ... R1/2 and G1/8 ... G1/2.

# Quick connectors – Product range

NPCK

Datasheets → Internet: npck

Stainless steel fitting for use in areas subject to intensive cleaning. Maximum corrosion resistance CRC 4. For pneumatic applications with a temperature range up to 120 °C and a pressure range up to 12 bar.
Tubing O.D. 4, 6, 8 and 10 mm with connecting thread M5 and

# Click fittings – Product range

NPKA

Datasheets → Internet: npka
Polymer fitting for easy installation

Polymer fitting for easy installation with one hand. Hydrolysis-resistant, FDA-compliant and easy to clean. For pneumatic applications with a temper-

ature range up to 60 °C and a pressure range up to 10 bar.
Tubing O.D. of 6 mm with connecting

thread G1/8.

#### General

The fitting NPCK is safe for use with food and fulfils all the clean design require-

The special design of the union nut avoids edges and areas where microorganisms

and other forms of contamination might accumulate.

G1/8 ... G3/8.

The NPCK is made entirely of stainless steel and is ideally suited for use in areas subject to intensive cleaning.

NPCK is thus the ideal addition to the existing range of clean-design drives and valve terminals from Festo.

#### Mounting:

- [1] Screw the screwed plug (1) and the sealing ring (2) on to the counterpart and tighten in accordance with the nominal tightening torque.
- [2] Push the plastic tubing (3)
   through the union nut (4) onto the nipple of the screwed plug
   ( → Fig. 1).
- [3] Screw the union nut into the screwed plug until there is resistance from the counterpart (→ Fig 2). The tubing is thus secured and the sealing ring is pressed between the sealing surface, screwed plug, and union

#### Dismantling:

[1] In order to disassemble it, follow the steps in reverse order.

Figure 1:

Figure 2:
